

Customers, Sellers & Geography

RFM segmentation, top sellers by composite score, and customer-seller geographic flow. Surfaces two structural findings: (1) RFM is degenerate for marketplace data — 97% of customers have frequency = 1, so segments mostly differentiate single-purchase customers by recency and spend; (2) Brazil's e-commerce is hub-and-spoke around São Paulo, with SP-to-SP as the dominant single route.

Top 20 Sellers by Composite Score

State	City	Orders	Revenue (R\$)	Avg Review	Avg Days	% Late	Score
SP	belo horizonte	109	R\$15486.00	4.59	6.60	1.83	96.1
